IAERE10 Tour

2 November 2022, 10:45 am-11:30 am

Organizers: Simone Borghesi, Matteo Mazzarano

Venue: University of Siena, Via Mattioli 10, Siena

Speaker: Matteo Mazzarano

Title: Optimists and Pessimists in Climate Policies.

Abstract: Recent works indicated the presence of an anomalous level of anxiety between young and educated people with respect to climate change. This level of anxiety might affect the expectations and attitudes toward current policy instruments to a backlash or excessive ambitions, despite positive effects. The methodology behind the Cli.P. (Climate Policy) Survey as a way to frame support and optimism will be presented, and implications are discussed with participants.
